

1099 PROCESSING

The Internal Revenue Service (IRS) requires that recipients of certain financial transactions pay taxes on those transactions. The providers of taxable benefits are required to notify the recipients of such taxable transactions and must file all returns with the IRS. The information return shows the reportable income for the vendor during the tax year. Currently four types of 1099 forms are issued; 1099-MISC for miscellaneous income, 1099-INT for interest income, 1099-S for real estate transactions and 1099-G for government grants.

TERMINOLOGY

1099 Reporting Classification (1099CL) Page	Establishes valid 1099 Reporting Classification Codes, and the relationship between the Vendor Organization Type, Vendor Organization Classifications, TIN Types and 1099 Classifications.
1099 Maintenance (M1099) Document	Enables authorized users to create or modify records on the 1099 Reported Income (1099R) Page.
1099 Reporting Information (1099I) Page	Defines valid Taxpayer ID Number (TIN) and TIN Type combinations and provide tax related information for the 1099 Reporting process.
1099 Reported Income (1099R) Page	Records the consolidated income from the 1099 Journal per Taxpayer ID Number and Taxpayer ID Number Type. The page is initially updated with records from the 1099 Journal the first time the 1099 process is executed for a calendar year. From that point on, any updates or corrections to 1099 information are done here.
1099 Type of Income (TINC) Table	Defines the valid values for an income type and Form Type used in the 1099 reporting process.
1099 Reporting Payer Information (1099RP) table	Defines the information Taxpayer Identification Number (TIN) Tin Type, Name Address and /contact Information for each Reporting Payer for whom you report to the IRS.
Department Fiscal Year Controls (DEPTFY)	This page allows departments to set controls that differ from one fiscal year to another. It contains a 1099 Reporting Payer field that may be used to define the 1099 Reporting Payer associated with the Department Fiscal Year Record.
Business Intelligence (BI)	A combined reporting solution that provides a warehouse for wvOASIS data, tools to populate the warehouse efficiently, a toolset to access the data in the warehouse and pre-defined folders that allow easy access to data in the warehouse.

Taxpayer ID Number (TIN)	The number used by the Internal Revenue Service to identify taxpaying entities.
Taxpayer ID Number Type	A further breakdown of a Taxpayer Identification Number indicating whether it is an Employee Identification Number (EIN) or Social Security Number (SSN).
Vendor/Customer Creation (VCC) Document	A document that allows you to add new records to the Vendor/Customer (VCUST) table, 1099 Reporting Information table, and the Customer Account Options table. The VCC document is sent through workflow and the approval process.
Vendor/Customer Modification (VCM) Document	The document that is used to modify or add to an existing vendor or customer record. This document is used to update Vendor/Customer table information, Customer Account Options table information, and 1099 Reporting Information table information. This document is sent through workflow and the approval process.
Vendor/Customer (VCUST) table	Contains all vendors and customers that are used throughout wvOASIS.
Valid Vendor Organization and 1099 Reporting Classification (VORGCL) page	This page establishes the valid combinations of Organization Type, Organization Classification, TIN Type, and 1099 Reporting Classification.

TABLE SET UP FOR 1099 PROCESSING

Multiple tables are required for the setup of 1099 processing in wvOASIS.

Many of the tables are configured with the implementation of wvOASIS, and will not require updates unless the general business and policy of the State changes or if there are changes in the IRS guidelines.

Throughout a Fiscal Year, Object Codes and/or Sub Object Codes may be added which, when defined, will need to indicate if the code is taxable. The addition of new vendors and modification of existing vendors is an ongoing, daily process initiated both by vendors and agency users requesting modifications to a vendor's setup.

OBJECT CODE (OBJ)

The Object Code (OBJ) table establishes valid object codes as 1099 Reportable, and includes associated information related to the object. Sub-Objects will also be set as 1099 Reportable, as appropriate.

There are certain situations where a type of income may not be reportable for specific vendor classification but where certain Objects are considered always reportable by the IRS. Examples of the types of reportable situation is Legal Services and Medical Services. Per the IRS, a corporation may not be generally reportable unless the income is associated with Legal Services or Medical Services. 1099 Classifications exist that are reportable; Attorney Corporation and Medical Corporation, however, Object and Sub-Objects also direct the correct reporting requirements by checking “Always 1099 Reportable”

The screenshot shows the AMS Advantage web application interface. The top navigation bar includes links for Home, Personalize, Accessibility, App Help, and About. The main content area is titled 'Object' and displays a table of object codes. The table has columns for Fiscal Year, Object, Name, Active, Effective From, and Effective To. A single row is visible for the year 2014, object 3206, named 'CONTRACTUAL SERVICES', which is active and has an effective date from 1/1/2014 to 12/31/2014.

Fiscal Year	Object	Name	Active	Effective From	Effective To
2014	3206	CONTRACTUAL SERVICES	Yes	1/1/2014	12/31/2014

Below the table, there are links for 'First', 'Prev', 'Next', and 'Last'. The 'General Information' section contains fields for Fiscal Year (2014), Object (3206), Name (CONTRACTUAL SERVICES), Short Name (CONTRACTUAL SE), Contact Code, Effective From, Effective To, Active (checked), and Budgeting (checked). The '1099 Info /1042-S Info' section contains fields for 1099 Income Code (6), 1099 Form Type (M), 1099 Type of Income (7), Always 1099 Reportable (unchecked), 1042-S Income Code ID, 1042-S Income Code, 1042-S Type of Income, and Contract Withholding Exempt (unchecked).

VENDOR TO OBJECT CODE VALIDATION

1099 Type of Income (TINC)

The 1099 Type of Income (TINC) page defines the valid types for an income type and the Form Type used in the 1099 reporting process. The table is linked to the Object, Sub-Object, Balance Sheet Account, and Sub-Balance Sheet Account Pages to define the valid Types of Income.

This table contains the following fields:

- **Form Type** – The IRS form type (for example, 1099-S, 1099-MISC, 1099-INT, and 1099-G).
- **Type of Income** – Corresponds to the valid box numbers on each form type (for example, Type of Income “1” corresponds to Box 1 on the 1099-MISC form).
- **Name** – The description of the Type of Income (for example, Type of Income “1” is Box 1 Rents on the 1099-MISC form).
- **Threshold** – Represents the minimum amount of money that needs to be paid to a Vendor before the Vendor, if 1099 Reportable, is required to report its earnings to the IRS. The IRS sets these threshold amounts, annually. If the IRS changes any thresholds, this table will be updated at the end of the calendar year, before the Offline 1099 Process is run.
- **Vendor Classification Check Boxes** – Boxes for individual, Incorporated, Trust, Sole Proprietor or Partnership, as well as Backup Withholding. When checked, this indicates that either Vendor income is reported for only the specified Vendor classification or that the income type is eligible for Backup Withholding.

AGENCY 1099 REVIEW

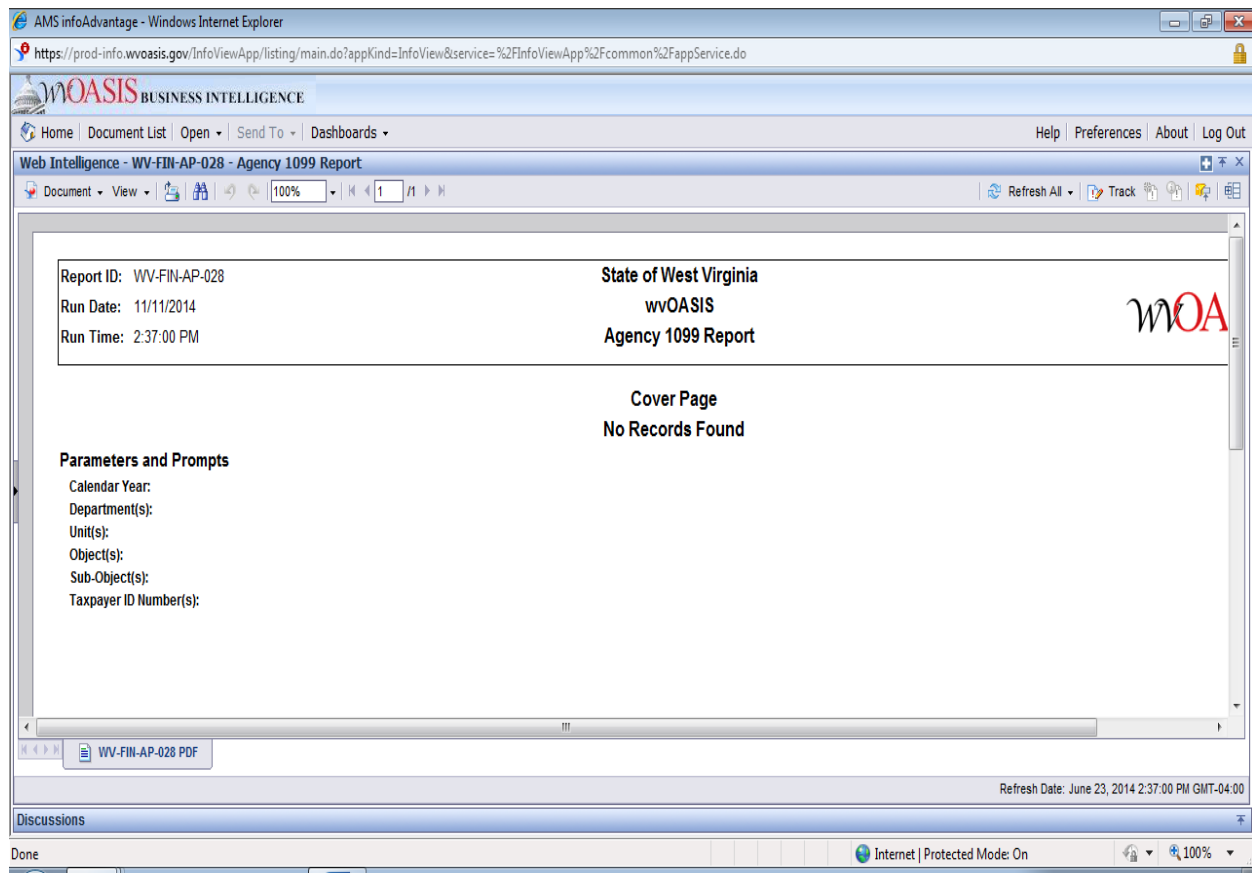

Agencies will have the ability to review, verify and modify if necessary, 1099 reporting information, for the current year.

WV-FIN-AP-028-Agency 1099 Report – this report displays detailed information related to the 1099 process. The report is used by all departments.

Agencies review the report and make any necessary adjustments to reportable income or Vendor records by creating/submitting 1099 Maintenance (M1099) documents and/or VCC documents or VCM documents.

WV-FIN-AP-028-Agency

- Navigate to Business Intelligence
- Select Document List
- Select Public Folders
- Select wvOASIS
- Select Advantage Financial
- Select Accounts Payable
- Select WV-FIN-AP-028-Agency 1099 Report

Processing the report:

- Enter Calendar Year
- Optionally enter Department (s)
- Optionally enter Unit (s)
- Optionally enter Object (s)
- Optionally enter Sub-Objects (s)
- Optionally enter Taxpayer ID Number (s)
- Click Run Query

Review Report:

- Review records for accuracy.

1099 ADJUSTMENTS

In-Kind Adjustments (adding a 1099) or Corrections

The In-Kind Adjustment is similar to a correction. It is a transaction that takes place outside the financial system, and therefore there is no record for it. For example, an Agency “gives” a vendor 20 football tickets to a game. There is no financial transaction linked to this, but the agency designates an amount (for example \$600). Since no payment document went to the vendor, a M1099 gets created in the amount of \$600 to represent the cash value of the tickets. Users will add 1099 records when transactions have not been recorded in the financial system, and then make adjustments to current records.

Adding a new 1099 record for a transaction that did have a financial transaction but did not create a 1099 record is processed the same as the In-Kind Adjustment. This type of “add” could be the result of a real estate transaction that did not close in the year the check was presented for settlement but concluded in the next tax year (this transaction would have been deleted from the previous years 1099s), or a financial transaction did not create a 1099 due an incorrect Object/Sub-Object used, or interest not paid but made available. These types of “adds” are also created by a M1099.

Correction to an existing 1099 is also created by a M1099. If modifying an existing record, General Information fields will be populated. The M1099 modifies the entire 1099 amount for that box # on 1099R.

Add or Modify Vendor Information before Creating 1099 Forms

Because 1099 data is obtained from the 1099 Journal during the execution of the Offline 1099 Process based on a Vendor’s Vendor/Customer code, Vendor information such as the Legal Name or the 1099 mailing address can be changed at any time before forms are generated without affecting the reported income and forms output. A Vendor/Customer Modification (VCM) document is used to modify or add to an existing vendor or customer record. This document is used to update the Vendor/Customer table information, Customer Account Options table information, and 1099 Reporting Information table information.

It may be necessary to add a new vendor as the vendor information for a new 1099 does not exist in the Vendor/Customer table. The Vendor/Customer Creation (VCC) document is used to add a new vendor or customer record. The Vendor/Customer Creation (VCC) document updates all tables as listed above. An Internal Revenue Service form W-9 is required for the new record.

If a vendor notifies an agency during the calendar year that their name or their Taxpayer Identification Number (TIN) has changed, an updated Internal Revenue Service form W-9 is required. The new form and request is to be sent to the Finance Division which will review the request and update the record, if necessary.

Processing a New 1099

Navigate to 1099R to verify if a vendor's TIN exists on 1099R:

Search:

- Calendar Year:
- Taxpayer ID:
- 1099 Reporting Payer:

The screenshot shows the SIS (Student Information System) interface for processing 1099s. The main window is titled "1099 Reported Income" and features a search bar at the top right with a "Jump to:" field set to "1099R" and a "Go" button. Below the search bar is a navigation menu with tabs: "Procurement", "Budgeting", "Accounts Receivable", and "Accounts Payable". The main content area has a table with columns: "Calendar Year", "Taxpayer ID", "TIN Type", "Form Type", "Processing Indicator", "IRS Reported", "Current Record", "Generation Date", and "1099 Reporting Payer". A "Search" button is located to the left of the table. A modal form is overlaid on the table, titled "Search - Windows Internet Explorer provide...". The modal form contains the following fields: "Calendar Year : 2014", "Taxpayer ID : 789456123", "Form Type : [dropdown]", "Name : [text]", "1099 Reporting Payer : 1200", and buttons for "Ok", "Clear", and "Cancel". The background form also includes a "General Information" section with fields for "Name", "Address", "City", "State", and "Zip".

Note if a record already exists for the vendor (Record exists for a vendor being used).

If a record did not exist for the vendor you may create a new record by:

Navigate to **Document Catalog**

- Click Create
- Code: M1099
- Dept:
- Unit:
- Click Auto Numbering
- Click Create
- Doc ID Created for M1099

Additionally, the user can click on the “Create New Record” link on 1099R in order to create a new M1099 (see screenshot below) where the instructions would pick up at Dept# from the list above.

In the **Document Description** field, enter the reason for creating M1099

Navigate to the **1099 Reported Income Section** and click Insert New Line

General Information, enter values:

- Select **New** if record did not exist on 1099R; select **Modified** if record did exist
- Calendar Year:

- Taxpayer ID:
(Enter the value if known, or using the Picklist, browse using *and the last four digits in the Taxpayer ID field and select the appropriate vendor)
- Tin Type
- Form Type:
- 1099 Reporting Payer:
(Enter the Reporting Payer Number if value is known, or use the Picklist and select the appropriate number.)
- **Save;**

Note: Name and Address fields will populate once validated

The screenshot shows the '1099 Reported Income' form. At the top, there is a table with columns: Line Number, Taxpayer ID, TIN Type, Form Type, Name, and 1099 Reporting Payer. The first row contains: 1, 789456123, 1099-MISC, 1200. Below the table, there are navigation buttons: First, Previous, Next, Last. A 'Go to line:' field with a 'Go' button is also present. A 'List View' button is on the right. The main section is titled 'General Information' and contains the following fields:

- Action: New (dropdown)
- Calendar Year: 2014
- Taxpayer ID: 789456123 (with a picklist icon)
- TIN Type: SSN/TIN/ATIN (dropdown)
- Form Type: 1099-MISC (dropdown)
- Generation Date: 11/20/2014
- Processing Indicator: New
- IRS Reported: No
- Comments: (text area)
- Name: (text field)
- Name (cont.): (text field)
- Address: (text field)
- City: (text field)
- State: (text field)
- Zip: (text field)
- 1099-S Form Number: (text field)
- 1099 Reporting Payer: 1200 (with a picklist icon)

At the bottom, there is a toolbar with buttons: Save, Undo, Insert New Line, Insert Copied Line, Edit with Grid, Copy, Validate, Submit, Discard, Print, Processing, Workflow, File, and Close.

REPORTED INCOME INFORMATION

- Box:
(Select the appropriate Box number for the Type of Income and enter the dollar amount, the TINC and Object/Sub-Object tables should be used for reference.)

The screenshot shows the '1099 Reported Income' form, specifically the 'Reported Income Information' section. The top part of the form is identical to the previous screenshot. The main section contains two columns of boxes for reporting income:

- Box 1: (text field)
- Box 2: (text field)
- Box 3: 700.00 (text field with a picklist icon)
- Box 4: (text field)
- Box 5: (text field)
- Box 6: (text field)
- Box 7: (text field)
- Box 8: (text field)
- Box 9: (text field)
- Box 10: (text field)
- Box 12: (text field)
